**Description:**

The Senior Cognos Developer is an experienced developer that will be responsible for creating active Cognos reports and/or dashboards. This role will ensure data quality and accuracy of reporting as well as dashboard creation, analysis, and data gathering. This team member will work closely with the IT business analyst to define appropriate metrics, and will have a high level of understanding of how to produce accurate and meaningful metrics to deliver high quality, actionable, efficient, and interactive reporting to drive business decisions.
