**Price:** Check with seller

**Description:**

Multi-vendor script enables the participation of different individual vendors in a common platform to sell their products. You can provide that platform for setting up your own multi-vendor E-commerce site and can generate good revenue from there. First, you have to be clear in what all ways you can bring users to your site. Revenue can be generated only by sellers selling their products through your sites and buyers showing interest to buy it through your site.
