Description:

Manually operating the landing gear causes injury to 2.5% drivers annually. This figure gets even worse when it comes to drivers aging 50 or older and as well as female drivers. Patriot Lift Co - the world leader in air powered landing-gear automation for the transportation Industry has the solution to this problem. Their advanced set of landing gear automation technology effectively reduces worker compensation costs while delivering operational productivity. Visit onlift.com today and start increasing your productivity without high cost. Give us a call at 207-703-8433 for any immediate queries.
