1968 Jaguar XKE Series 1.5. Open headlights with a Series 1 body. I only drive it on fine days otherwise it is always garaged. It looks fantastic, drives well and gets a lot of attention. It is not a trailer queen, that said it presents very well and I regularly show it at the Colorado Conclave. The Head is not original to the car, it was replaced by a previous owner. The car also had a respray of the original primrose yellow, I would rate the paint as 7.5 out of 10. It shines well and is in good condition. The interior is in good condition. I believe the seats are the originals. The Armrest was professionally replaced last summer. The Soft Top is in good condition as is the Boot cover. Overall it is a wonderful car...
