Has a clean title, has brand new water pump and bolts, good tires good engine. It needs some work done I'm not sure what it is, I got done putting in the water pump and putting it all back together. Then I started up but made some funny sounds the fan was hitting the plastic shroud around it. I fixed that, then I started to back up I was sitting there revving it up a little bit. When all of a sudden has the pressure behind the dipstick for the motor oil and the pressure pushed the dipstick out about 12 inches and it look like oil blew up so I shut it off when's notice there was red fluid under it which I thought was a power steering fluid but it might be the transmission fluid so I'm not sure which it is they n...
