Price: 99.99 USD

Description:

LED Wall packs lights are the most durable and efficient form of lighting that can increase the brightness at the outer parts of the commercial and industrial buildings and by using these lights you can continue the operations at your factory throughout the day without worrying about the heated lights. Among many available designs, you can use Forward-thrown 120W LED Wall Pack Light as per your lighting requirement to increase the visibility and ambiance of the area. Beneath are the advantages of using forward-throw 120w LED wall pack light: This forward-thrown 120w LED wall pack light is a great replacement to the metal-halide or halogen bulbs with 420 watts. By using these 120w LED lights, you can make a savi...
