Description:

DeskTrack is an automated time tracking software which records the insight details of the desktop i.e. it keeps the list of applications opened, URLs browsed, files opened with the total time spent on them. This record helps in identifying the actual work we did & distractions faced all through the day. It is also useful for managing the project timesheets by linking the files and URLs to the specified projects. Mainly it helps in increasing efficiency & productivity by 40%.
