SFR-M Series Compensation Module
Type: low voltage filter power capacitor
Functional: dynamic reactive compensation eq...
Power quality: power factor correction

SFR-SVG Series Static Var Generator
Type: power factor correction
Functional: load balancing
Communication: RS485

Contact: sfere elect

Phone:

Address: Washington, District of Columbia, United States

Price: Check with seller

Description:

Power factor data Logger is an easy to use, non-invasive device for monitoring single and three phase power supplies. It is typically used in high consumption premises such as factories, manufacturing plants, distribution warehouses, retail units and hospitals to assess energy usage and help identify areas in which to improve energy efficiency and cost effectiveness. https://www.sfere-elec.net/products/Power-Quality-and-Power-Factor-10.html
