Description:

Today, the Handmade Sink manufacturer will teach you how to clean the sink wall and kitchen leaks: 1. Cleaning of kitchen leaks Kitchen leaks are often found to be easily clogged, and they are often found to be more corroded; so you can put a little baking soda when cleaning the leaks, then pour a small amount of white vinegar, and use some soft cleaners to wash out the foam. Then rinse repeatedly with water. If you don't want to clean frequently, you can also use a one-time net to solve this trouble. 2. Cleaning of the sink wall If there are "floating rust" and "mildew spots" on the wall of the sink, you can use scouring powder or toothpaste on the rust and spots, and wipe it off with a rag. The above content ...
