Reefer containers are one of the different container types. It is purposely used for the shipment of perishable goods- goods that cannot be shipped in a general cargo container. Reefers have inbuilt refrigeration units or heating or cooling units that can retain temperature over long distances. It keeps goods fresh over long distances. It is designed in a way that restricts the flow of air. With proper insulation, it keeps the inner temperature stable. At LOTUS Containers, we help you acquire all dimensions of reefer containers at a very reasonable budget.
