Price: 3500.00 USD

Description:

For sale Pro Motive Yamaha R1 Bike Engine Classic Mini Kit This kit will turn a classic mini into a monster road or track car. The kit consists of a subframe that's been modified to take the R1 engine and fit directly into the standard classic mini engine bay. The kit has never been used. I bought this to put into my mini which has since been condemned as it needed too much welding to get it right. I was going to buy another classic mini to fit this into but going to move onto a different project instead. The kit includes the following: Mini front subframe powder coated silver complete with mountings for engine and driveline Bespoke tubular exhaust manifold with insulation wrap fitted (mates to a 2" mini perform...
