Contact: Sara Suarez

Phone: 1-609-632-0350

Address: New York City, New York, United States

Price: Check with seller

Description:

In this pandemic scenario, many traditional business processes have introduced serious disruptions to business applications and transactions. The usage of centralised architectures remains a threat to most organisations. With Blockchain application development, businesses can now function in a decentralised manner with precise level of transaction certainty. Some other characteristics of Blockchain design architecture include features like auditability, transparency, security, and supportive transitions.
