Phone: 1-609-632-0350

Address: New York City, New York, United States

Price: Check with seller

Description:

Not every cross-platform app is built equal. To develop hybrid apps for various mobile platforms with Apache Cordova is highly reliable. Getting started with Apache Cordova mobile application development is easy. Apache is feature-powered which allows you to improve, compile, and install highly practical mobile apps. Cordova decreases development duration and costs since you do not need to form a separate app for each OS that you are planning to maintain.
