Price: Check with seller

Description:

The digital quick printing system is mainly composed of a pre-press system and a digital printing machine. Some systems are also equipped with binding and cutting equipment. Its working principle is: the operator outputs the original manuscript (graphic digital information), or digital information of digital media, or network digital files received from the network system to the computer, and then creative, modify and arrange on the computer to satisfy the customer. After RIP processing, the digitized signal becomes the corresponding monochromatic pixel digital signal, which is transmitted to the laser controller, and the corresponding laser beam is emitted to scan the printing cylinder. The printing cylinder (...
