**Description:**

With the development of the current society, people often use printing technology to help us print on book paper, and the printing technology is also different, so what are the common printing processes for book covers? The following is introduced by Printing Company. What are the common printing processes for book covers? There are many printing processes for the cover, such as bronzing, embossing, laminating, oiling, UV, etc. This depends on the needs of your book. Book printing involves many aspects, such as the quality of its own design, the choice of paper, the size of the book, and the later process. Several common processes in the cover of book printing: Bronzing / bronzing silver Definition: hot press t...
