Address: Gold Canyon, Arizona, United States

Price: Check with seller

Description:

This project started out to be my daily driver. Once finished and I started the original 3 cylinder 2 stroke I knew I needed to do an Electric conversion. I used an Azure Dynamics 3 phase AC24 motor and matching DMOC445 controller with regenerative braking. Which accounts for up to 10% of mileage per charge. It is a 200vdc, 100a system which equals 21.5kwh Lithium battery pack. Very easy to maintain and charge. Comes with two chargers. Using one will allow charging to 80% @ 12a charging rate. With two it charges to 100% @ 24a giving it a much faster charge. Can be charged at home or at public charge stations. It has an electrical reverse so changing gears is not necessary. The vehicle has had a body off restora...
