Description:

The control room console is specialized furniture designed to mount the controlling equipment to cater to mission-critical operations. The console helps an operator to swiftly perform monitoring and controlling activities. The console is designed to provide comfort to the operators during their routine operations. By applying the principles of engineering and architecture; the console conditions the physical aspects of furniture in favor of the control room operator. The purpose of the console is to make the constantly running operations easy to execute in both normal & emergency conditions. The Industrial control room console furniture is designed in line with quality standards to optimize different physiologi...
