Description:

Fadal Machine Amplifiers are electronic devices or circuits used to increase the magnitude of the signal applied to their input. The brand offers good-quality amplifiers with accessible fault detection features. ITS New Glentek AC brushless amplifiers for Fadal machines are featured with 5000 Line Encoder. These are designed in a linear way and rotate in 10 amps continuous and 20 amps peak. Fadal Machine Amplifiers are designed to drive a 6-pole motor with a 5000 line encoder. Each of the Fadal amplifiers comes with an instruction manual containing the safety instructions to avoid any kind of malfunctioning or personal injuries.
