Price: Check with seller

Description:

Beautiful 1964 2 door Chevrolet Impala coupe. This is a factory air car with the original 327 engine bored over to a 383 stroker with about 5,000 miles on it. Replaced original power-glide with a 700R-4 automatic transmission. Magnaflow exhaust system, exits in front of rear tires for great sound when cruising. New 1806 Edlebrock 650 Thunder Series carburetor with electric choke. A couple pumps and the car starts right up and runs great. Upgraded front and rear suspension with global west tubular upper and lower control arms as well as the rear trailing arms. Car responds perfectly. Front has 2" drop spindles with new springs, back had one ring cut from springs. Replaced the steering assist to 605 steering box....
