

WHAT IS THE BEST MATERIAL FOR COOKWARE?

free-classifieds-usa.com

Contact: hasan sharker

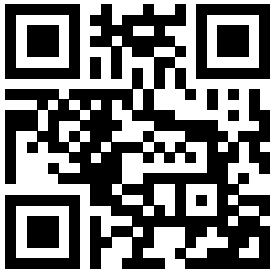

Phone:

Address: California City, California, United States

Price: 89.00 USD

Description:

Aluminum is the metal that offers the best combination of lightness, high thermal conductivity, and mechanical resistance (essential characteristics for a good pot). However, in the best aluminum pans, it is easy for the food to stick to the bottom.
