

# BUILD A CRYPTO PLATFORM BY USING NFT MARKETPLACE LIKE SOLSEA

free-classifieds-usa.com

Contact: Darly Dixon

Phone:

Address: Amity, Arkansas, United States

Price: Check with seller

Description:

Solsea NFT marketplace is built on a blockchain named Solana. It is gaining more traction by the day due to its features (such as the very low-cost transaction to compare other blockchains or the marketplace fee) and the characteristics of its host chain. Solsea enables permissions for the users to upload their files to develop their own NFT or for a group of collections. It is favorable for the audiences as they can create their own space on top of the Solana blockchain.
