Tekla
Model Sharing

Contact: Stridely Solutions

Phone:

Address: Chicago, Illinois, United States

Price: Check with seller

Description:

Tekla Model Sharing is the only construction sharing technology that allows work predominantly offline. Work with the same model at the same time, with users in different locations and time zones. Changes within a model segment are only reflected when users choose to sync to the central model. Model sharing decreases the chance of mistakes and saves time because models no longer have to be merged and checked manually. The main capability of Tekla Model Sharing is that it facilitates teamwork and dramatically increases productivity for users. Throughout the production process, the work is accelerated, whether it is modeling, the various stages of production or even assembly. Thus, all project stakeholders are ...
