**Description:** 

Selenium is one of the best known and widely used software testing tools which is free, open-sourced and is used for testing web applications across different platforms and browsers. The process of Selenium Automation Testing embodies a single interface and allows the user to write test scripts in different programming languages like Java, Python, C#, Ruby, Perl, PHP and NodeJS. We at Syntax Technologies provide you with best guidance and skills related to all aspects of Selenium through our SDET Automation Testing Course.
