Address: EMA Design Automation, 22 Tech Park Dr, Rochester, Ny 14623, United States, Rochester, New York

Description:

The primary objective of the REACH is to create a safer environment for the public. We, at Sunstream, help the companies to maintain the REACH Compliance. We make sure to conduct all lab tests and produce a report. With the data, we will convert any non-compliant products to the compliant product. Our services also help in obtaining the compliance data by getting the certificate and compliance statement from REACH. We also deal with the conflict mineral compliance which is becoming a major challenge for the companies who are SEC listed. Hence, approach us for more details.
