Description:

The shoulder is one of the most movable joints in the human body. The rotator cuff, a group of four muscles and their tendons, gives the shoulder its wide range of motion. When the rotator cuff tendons become trapped under the bony area in the shoulder, the tendons become inflamed or damaged. This condition is called rotator cuff tendinitis or bursitis, which is one of the most common causes of shoulder pain. How is Shoulder Pain Treated?Bloom Physical Medicine experts will examine your health history, perform a physical exam and may request specialized imaging to determine the specific causes of your pain or discomfort. To finish the consultation, the experts will talk with you about how your shoulder pain is ...
