Description:

WHAT IS THE NVIDIA GEFORCE GTX 1080? The GTX 1080 is Nvidia's latest top-end graphics card, ready to take on this year's two-pronged assault of VR and 4K gaming. If you're wondering why Nvidia's made such an enormous song and dance out of a consumer graphics card launch, it's because the company spent 'billions' on getting its new architecture to market and now has to make the numbers add up. Both financially and in GPU performance. The performance of the GTX 1080 really isn't in doubt – a company like Nvidia wouldn't launch its flagship graphics card without full confidence that it'll do a good job. I can say right now that this is the best GPU you can buy. Computer Answers of Clifton Park can get you ready fo...
