Description:

Regenerative Medicine in Bellingham, WA Regenerative treatment seeks to replace cells, tissues, or organs damaged by trauma, disease, or congenital defects. Regenerative treatment aids in healing previously incurable diseases and injuries while also providing people with an alternative to surgery and drugs. Regenerative treatment mimics the bodys own healing processes in order to naturally accelerate the healing process. Regenerative protocol is used to hasten the healing of a variety of conditions. Treatment can take many forms, so our knowledgeable staff will assist you in determining the best regenerative modality for you.
