Address: 880 South Washington Street, Ravenswood, West Virginia, United States

Price: Check with seller

Description:

Toll compounding is a specialized service offered by toll compounders, who are experienced partners in polymer manufacturing. It involves the customization and compounding of polymer materials according to specific requirements. Toll compounders possess advanced equipment and expertise, enabling them to blend additives, fillers, and reinforcements with base polymers to achieve desired properties such as improved strength, flexibility, heat resistance, or color.
