Description:

Our flower ring features three contrasting diamond blossoms that are arranged in a fashionable asymmetry. The three various flower types, freed from convention, blossom with a wild touch, each one distinct down to the last little diamond petal. Plunge into a garden that blossoms exclusively for you with the flower collection. Each flower jewellery, which ranges from single blooms to floral clusters and blossoms arranged in a row, is intended to be worn in abundance and makes a statement of delicacy and empowerment. A radiant flower diamond https://jainjewelry.com/products/
