Address: Colorado Springs, Colorado, United States

Price: Check with seller

Description:

I make quality custom leather cases and sheaths for multitool Leatherman and Knives. I have different sizes for different tools and knives. The knife sheaths in stock are for medium size folding knives. The Leatherman cases fit the Wave model (smaller case) and my larger cases fit the Leatherman Super Tool and Surge models. I can make them to fit any size or brand. It makes sense to buy a quality leather case rather than depending on the flimsy cloth cases normally furnished where you take a chance of losing your tool or knife. The friction fit is held even tighter on your belt and other models have a snap closure. I have new cases and sheaths in the store every week. The prices start at \$45 and go up depending...
