Address: Houston, Texas, United States

Price: Check with seller

Description:

Since anti-oxidants alkaline water is good for the metabolism, it should prove to be a good solution for those dealing with issues of obesity and weight gain. Many claims also suggest that regular consumption of water with higher pH balance works greatly for better hydration rate. With 9.5 pH balances, you can be assured that your body gets the right kind of detox, getting rid of the acids that are part of overly diet routines.
