The advantage of using Non-Stop Heavy-Duty Scaffolding™ is that it saves you money by increasing your production. This system involves a single platform that moves up and down vertical towers. Instead of spending labor dollars setting up additional frames and planking the next level up, the scaffolding is simply raised (or lowered) using winches, allowing you to use 1/3 fewer planks. This type of scaffolding is also called crank-up scaffolding and elevated-platform scaffolding. Other benefits include: Non-Stop Scaffolding, Elevated Platform Scaffolding, Crank up Scaffolding Non-Stop Scaffolding for Sale Material is always handy: No more moving material between platforms and with the drop down platform material ...
