08 Z51 loaded Corvette with under 50k miles. It has a Brian Tooley stage 4 Supercharger cam, Platinum Springs with Titanium retainers, C5R timing chain. A&A Secondary Fuel System A&A V3 Supercharger with single intercooler Ported heads TDSS Carbon Fiber Driveshaft Ram Twin Disk Clutch Tick Master Dewitt's radiator MSD 2 step Texas Speed long tube headers NPP Car makes alittle under 650 hp has potential to make more on E85. It has been well cared for and garage kept. The only flaw I can think of is the image of the trunk mat, something spilled on it. The car is very fast and gets a lot of looks. Clean Carfax, clean title.
